The 6th FuegoRed International meeting 2015 brings together scientists, professionals and authorities dealing with wildfire researches, immediate soil protection against post-fire erosion, and land and ecosystem management after wildfire for restoration purposes in the current framework of Global Change.

This meeting is promoting the participation of young researchers, PhD. and undergraduate students by means of a seminar specialized on topics related to wildfires and their impact on ecosystem, soils and society. The aim is to enhance the cooperation between national and international research groups, local authorities, companies and associations to innovate, develop new technologies and methods for a better pre and post-management of wildfires.

The FuegoRed International meeting is a key scientific event due to the next year 2015 is the International Year of Soils being supported by the Spanish Society of Soil Science.
